

Application

Research on „Jung Concretes“ after the Heap with Temperature Controlled Formwork from -10° up to $+80^{\circ}\text{C}$

Features:

- In electromechanical horizontal testing machine Series LFMZ - H 400 kN
- For samples $150 \times 150 \times 1500$ mm or shape and dimensions as required according to your needs.
- Sample length deformation measurement with fibre bars and LVDT displacement transducers.
- Digital control system and testing software **DION** for automatic test procedure in closed loop mode and acquisition of force, displacement and temperature test data.
